

Solventborne

Product name
ACRYDIC WFL-367

Description

ACRYDIC WFL-367 is a solventborne acrylic resin modified with chlorinated polyolefin (CPO) to use as a 1K lacquer. ACRYDIC WFL-367 has excellent adhesion to polypropylene. It is recommended for PP substrate coatings primer.

Applications

Polypropylene coatings.

Key features

Adhesion to polypropylene (PP).
BTX free.

Characteristics

	ACRYDIC WFL-367
Appearance	Turbid liquid
Solids content, weight %	49.0 - 51.0
Viscosity, Gardner 25°C	Z1 - Z5
Color, Gardner	4 max.
Acid value on solution, mgKOH/g	0.5 - 2.5
Solvent	Butyl acetate / Methylcyclohexanone / Cyclohexanone / Methoxypropyl acetate

Storage

Store in a cool, dry, well-ventilated place at temperatures below 25°C.

Safe handling note

Refer to SDS for ACRYDIC WFL-367.
Please confirm with our sales representative regarding chemical regulatory status of intended countries.
