

Solventborne

Product name
ACRYDIC ZHL-201

Description

ACRYDIC ZHL-201 is a solventborne thermoplastic acrylic resin for 1K lacquer coatings. ACRYDIC ZHL-201 has excellent pigment dispersibility, hot stamping and slitting properties. It is recommended for packaging film color coatings.

Applications

Packaging film color coatings.
Industrial coatings.

Key features

Hot stamping properties.
Slitting properties.
Pigment dispersibility.

Characteristics

	ACRYDIC ZHL-201
Appearance	Clear liquid
Solids content, weight %	39.0 - 41.0
Viscosity, Gardner 25°C	2000 - 6500
Color, Gardner	2 max.
Acid value on solution, mgKOH/g	5.0 - 9.0
Solvent	Isobutyl acetate

Storage

Store in a cool, dry, and well-ventilated place at temperatures below 25°C.

Safe handling note

Refer to SDS for ACRYDIC ZHL-201.
Please confirm with our sales representative regarding chemical regulatory status of intended countries.
