

**Solventborne**

**Product name**

**BECKOLITE AL-4270-50**

**Description**

BECKOLITE AL-4270-50 is a solventborne saturated polyester resin to use in combination with amino resins for stoving enamels. BECKOLITE AL-4270-50 has excellent physical properties and hot water resistance. It is recommended for can and coil coatings.

**Applications**

Exterior can coatings.  
Coil coatings.  
General industrial coatings.

**Key features**

High gloss.  
Hardness and flexibility.  
Chemical resistance.  
Hot water resistance.

**Characteristics**

	<b>BECKOLITE AL-4270-50</b>
<b>Appearance</b>	Clear liquid
<b>Solids content, weight %</b>	49.0 - 51.0
<b>Viscosity, Gardner 25°C</b>	Z2 - Z4
<b>Color, Gardner</b>	3 max
<b>Acid value on solution, mgKOH/g</b>	2.5 - 3.5
<b>Solvent</b>	Solvesso-150 / Cyclohexanone

**Storage**

Store in a cool, dry, and well-ventilated place as mentioned in SDS.

**Safe handling note**

Refer to SDS for BECKOLITE AL-4270-50.  
Please confirm with our sales representative regarding chemical regulatory status of intended countries.
