

Waterborne

Product name
BURNOCK DNW-5502

Description

BURNOCK DNW-5502 is a water dispersible polyisocyanate hardener. BURNOCK DNW-5502 has excellent dispersibility and stability in water. It is recommended as a hardener for 2K polyurethane coatings.

Applications

Hardener for 2K waterborne polyurethane coatings.

Key features

- Dispersibility in water.
- Stability of isocyanate groups in water.
- Compatible with waterborne acrylic resins.
- Low foaming.
- Low odour.

Characteristics

	BURNOCK DNW-5502
Appearance	Light yellow clear liquid
Solids content, weight %	79.0 - 81.0
Viscosity, Gardner 25°C	S - W
Color, Gardner	1 max.
NCO content, %	13.0 - 14.0
Solvent	Propylene glycol diacetate

Storage

Store in a cool, dry, well-ventilated place at temperatures below 25°C.

Safe handling note

Refer to SDS for BURNOCK DNW-5502.
Please confirm with our sales representative regarding chemical regulatory status of intended countries.
