

Waterborne

High solids

Product name

EPICLON EM-85-75W

Description

EPICLON EM-85-75W is a waterborne 2K epoxy resin for concrete coatings. EPICLON EM-85-75W has excellent anti-corrosion properties and chemical resistance. It is recommended for concrete primer coatings.

Applications

Concrete primer coatings.

Key features

Anti-corrosion.
Chemical resistance.

Characteristics

	EPICLON EM-85-75W
Appearance	Milky white liquid
Solids content, weight %	74.0 - 78.0
Viscosity, Gardner 25°C	2000 - 8000
Epoxy equivalent weight on solids, g/eq	190 - 210
Solvent	Water

Storage

Store in a cool, dry, and well-ventilated place at temperatures below 25°C.

Safe handling note

Refer to SDS for EPICLON EM-85-75W.
Please confirm with our sales representative regarding chemical regulatory status of intended countries.
